

The Hague Retina

8th-9th March 2024
HagaZiekenhuis, The Hague

Being myself an Italian working as vitreoretinal surgeon in the Netherlands (and previously Belgium) for more than a decade, I had long the desire to bring together Retinal Specialists from these countries to share their expertise and confront each other on the most debated topics in the field of clinical diagnosis and surgical management of retinal pathologies.

The aim of the "The Hague Retina" is thus to explore theoretical and practical aspects of patients' clinical management and look at them from different perspectives, analyzing the contributions of different schools of thought.

During the conference pathophysiological and clinical aspects of the main retinal diseases will be examined, technological advances and novel techniques in the surgical field will be showcased, and effective and innovative approaches to the treatment of the major retinal conditions will be highlighted.

Looking forward to welcoming you in The Hague, 8th-9th March 2024.

Giulio Bamonte
